

FOCUS ON LIFE SCIENCES CONSUMABLES

IVD Consumables Solutions

ZHEJIANG RONGDA BIOTECHNOLOGY CO., LTD.

INTRODUCTION

Zhejiang Rongda Biotechnology Co., Ltd. was established in 2018. Our company's headquarter is located in Huangyan, Taizhou, an economically developed and scenic eastern coastal area in Zhejiang Province. We serve our customers with a science-based and quality-oriented spirit. Our company has a strong professional R&D team. At the same time, we have long-term cooperation with well-known domestic universities and scientific research institutions, and signed the contract of new products development and reagent experiments.

We adhere to the belief of "providing high-quality services for bioscience" and found the AMNGENT brand, focusing on cell culture, molecular biological consumables, biological sample library construction, safety management and the development and production of Class I and Class II diagnostic reagents. We continue to invest in high-end production equipment in the industry and introduce professional process technicians to form a new scientific management team. Our products have passed ISO9001, ISO13485, CE and other quality system certifications. AMNGENT continues to grow and develop, and our products are exported to companies in more than 80 countries and regions such as the United States and the European Union.

For the early-stage design and development of molds, our company also has a high-quality, professional and persistent team that makes full use of modern CAD/CAM design and the capabilities of a comprehensive CNC machining center to manufacture high-quality medical consumables and various molds.

Screw cap micro tubes - quality concept

all tubes have undergone a number of tests.

Having passed these defined test procedures, the screw cap micro tubes have been certified as follows:

- ✔ **Sterile**
- ✔ **Pyrogen-free/endotoxin-free**
- ✔ **Non-cytotoxic**
- ✔ **CE**

We guarantee that the following limits will not be

- ▶ **Sterility validated according to the ISO 11137 series of standards**
- ▶ **Pyrogens/endotoxins < 0.01 EU/tube**
- ▶ **Non-cytotoxic in accordance with the ISO 10993 series of standards**

Screw cap micro tubes -lower cap with O-Ring

Feature

- Medical Grade Material: USP Biological Reactivity test report ,USP Plastic Class VI grade
- Non-Cytotoxicity
- RNase & Dnase free
- Pyrogen /Endotoxin free
- Heavy metal-free
- Sterile
- Standard 100,000 clean workshop production
- Temperature range: -86 to 121 °C (-186 to 250 °F)
- **CE**

*Above mentioned can provide third-party reports or associated product reports

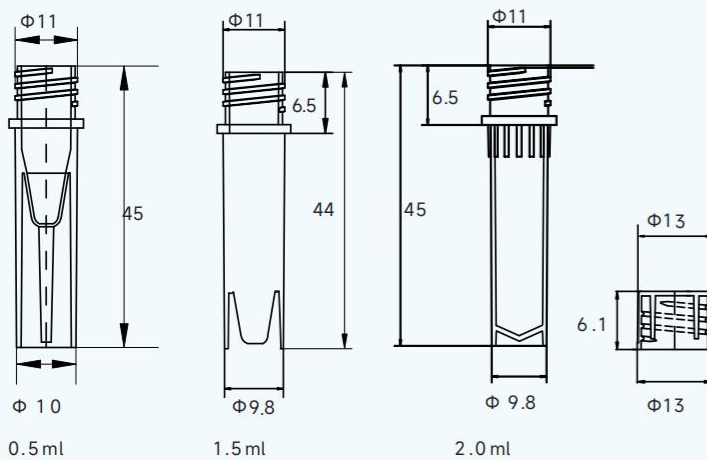

- Sarstedet version lower cap line.
- 0.5ml , 1.5ml, 2.0ml for options
- Cap color for options, easy for clarify sample
- Cap new technical : Rotary automatic stripping mold, smooth match with tube and without damping feeling
- Cap bottom design : Gas seal production technology,no leakage under stronger pressure.

- Tube design with skirted base and knurling ,suitable for automatic filling.
- O-ring cap increases cap security (IATA tested)
Sealing : under -90Kpa ,15mins testing. 40°C constant temperature test
- Comply with the biocompatibility test report
- Strong chemical tolerance to acids, bases and alcohols

Reagent bottle

Feature

- Medical grade PP & HDPE
- RNase & Dnase free , Heavy metal-free
- Volume options:4ml、 8ml ,15ml ,30ml ,60ml, 125ml ,250ml ,500ml ,1000ml
- Bottle one step injection and blowing.
- Open and use without washing
- Cap: PP , bottle : PP & HDPE for options
- PP bottle temperature: High temperature and autoclaving, The embrittleness temperature of PP : zero degree, usually max. Use under 135 degree
HDPE bottle have better Low temperature storage performance,The embrittleness temperature of PP : -100 degree, usually max. Use under 120 degree

- Acid and alkali resistance: When storing oxidizing materials, organic solvents such as benzene rings, n-hexane and chlorinated hydrocarbons use HDPE bottle
- Toughness and impact resistance :PP bottles have excellent resistance to bending fatigue, but poor impact resistance (especially at low temperatures); HDPE bottle resistance is good,Low temperature storage is not easy to break after impact
- PP is more transparent than HDPE and is more conducive to observing the state of the material stored in the bottle
HDPE brown bottle 200-800nm full wavelength light protection; USP specifies light transmittance <10%
- Gas (N₂,O₂,CO₂) barrier :HDPE material is obviously superior to PP material

Media Bottle

Feature

- Medical grade PETG
- High clear
- Rectangle shape, easy for hold and shipping
- E-Beam sterile, DNase & Rnase free, Non-endotoxin
- Temperature range: -86 to 60 °C (-186 to 140 °F)

- Cap : Rotary production process , easy and smooth match with bottle.
- Bottle : one step injection and blowing. No need wash and open use directly
- Clear and accurate scale, range 0.1mm
